Non-contact voltage testers and magnetic field testers

PAN Magnetfinder PROFI

Magnetic field tester with LED flashlight and magnetic cap – ideal for solenoid valves, relays, contactors and coils

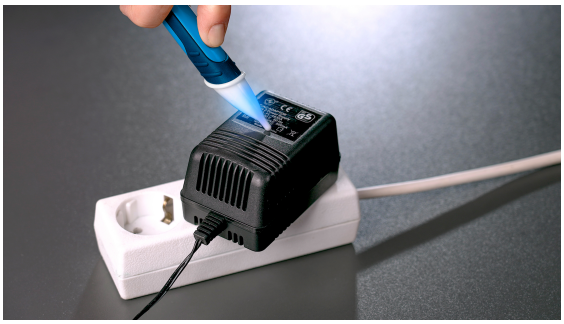

- Fully insulated, no metallic contact
- **LED torch**
- **A blue LED and an audible signal indicate a magnetic field**
- For permanent and electromagnets (direct and alternating current)
- For testing electromagnets, electric motors, solenoid valves, relays, contactors, conventional transformers, etc.

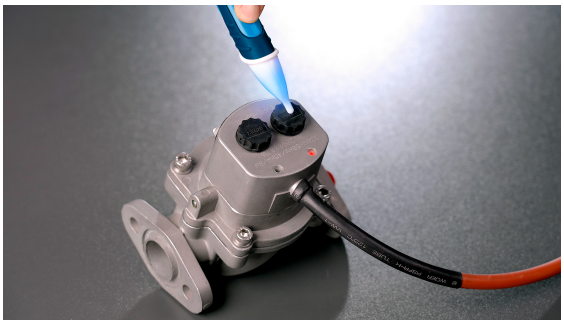

Scope of delivery: Magnetic cap for self-test, Operating instructions

Application Benefits at a Glance:

- Checks coils, relays, solenoid valves, contactors and motors without contact or opening the component.
- Quickly helps determine whether electrical actuation is present or the fault lies in the downstream component.

Technical Data	PAN Magnetfinder
Instrument dimensions	163 x 21 x 26 mm
Weight (gross / net)	118 / 29 g
Required battery(ies):	2 x 1,5 V AAA
