Universal- and junction connectors

VDM1

Universal- and junction connector

The **VDM1 Universal connection and junction connectors** was developed for a simple and absolutely safe connection for telecommunications- and power cables.
The VDM1 consits essentially of only three parts: The sleeve body, the rubber end cap and the cover form the main part.
To install the VDM1 without any tools, there are cable ties, lubricant and a cutting knife included.

- For telecommunications- and power cables up to 1000 volt
- Suitable for in-line and junction connections
- For underground cables and aerial wires
- Made for cables with a diameter from 5 - 14 mm - adaptable ending
- 4 entries
- No further tools needed
- Waterproof: IP68
- Humic acids- and corrosion-resistant
- Sealable
- Integrated eyelets for easy fixtur
